PERSONAL PROJECTS

BecomePro (ReactJS / JavaScript / Node.js)

- **BecomePro** is a platform offering educational football articles on training, nutrition, mental toughness, and performance. Users can authenticate, interact with, and manage their own content. The responsive design ensures an intuitive, user-friendly experience, making it a key resource for improving football skills and knowledge.
- [📄 GitHub repository](#) [🌐 Visit the website](#)

Grip Socks BecomePro Website (ReactJS / JavaScript)

- **Grip Socks BecomePro** is a responsive e-commerce platform designed to promote and sell high-quality grip socks. The site enables users to explore product features, view pricing, place orders, and access customer testimonials. It also includes a comprehensive FAQ section and personalized notifications, ensuring a seamless shopping experience across all devices.
- [📄 GitHub repository](#) [🌐 Visit the website](#)

More React Projects

- A collection of individual React projects, each in its own folder with a dedicated README file, live preview links, and clean, maintainable code. It serves as my personal workspace and reflects my ongoing journey to sharpen and deepen my React skills through practice projects, exercises and demos.
