PERSONAL PROJECTS

BecomePro (ReactJS / JavaScript / Node.js) (06/2024 - Present)

- BecomePro is a platform offering educational football articles focused on improving training, nutrition, mental toughness, and overall performance. Users can authenticate to read, like, and interact with articles, as well as create, edit, and delete their own content. The responsive design ensures a user-friendly experience, making it an essential resource for enhancing football knowledge and skills.
