PERSONAL PROJECTS

CulinaryCompass (Angular / TypeScript / Node.js)
- **CulinaryCompass** is a web application for exploring, sharing, and managing recipes. The CulinaryCompass application allows users to browse a collection of recipes, add new recipes, view their own profile, edit and delete the recipes the user have created.
- *GitHub repository*

BecomePro (ReactJS / JavaScript / Node.js)
- **BecomePro** is a platform offering educational football articles focused on improving training, nutrition, mental toughness, and overall performance. Users can authenticate to read, like, and interact with articles, as well as create, edit, and delete their own content. The responsive design ensures a user-friendly experience, making it an essential resource for enhancing football knowledge and skills.
