FREELANCE & SELECTED PROJECTS

NN Plants - B2B Wholesale Ordering & Inventory Platform

Next.js / TypeScript / Google Apps Script

Designed and developed a digital B2B ordering and inventory workflow for a wholesale flower business. Automated a previously manual sales process and supported scaling from ~20 to nearly 100 orders per import cycle. Built stock control, anti-oversell logic, order automation and the foundation for a dedicated full-stack platform.

[GitHub repository](#) | [Visit the website](#)

IBB Health

Next.js / TypeScript / Tailwind CSS

Developed the frontend for a professional health and wellness platform for a PhD pharmacist. Built responsive pages, service sections, multilingual content, testimonials, FAQ functionality and conversion-focused contact flows.

BecomePro

React / JavaScript / Node.js

Full-stack football education platform with authentication, user-generated content, and content management functionality.

[GitHub repository](#) | [Visit the website](#)

Grip Socks BecomePro - E-commerce Business Website

React / JavaScript

Built and operated a responsive e-commerce website for my own grip-socks business, including product presentation, ordering flow, customer testimonials, FAQ functionality, notifications, and mobile-friendly UX.

[GitHub repository](#) | [Visit the website](#)

Ninja Card - Frontend Contribution

Next.js / TypeScript / Tailwind CSS

Contributed frontend pages and UI components to an earlier version of a commercial NFC digital business card platform.
